-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 11 January 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 1 January 2007 have been fully considered but they are not persuasive. The applicant argues that the device of Hirano is used exclusively for the head. The limitations of claim one do not give any structural limitations limiting the size of the claimed invention. Hirano teaches a device with all the claimed structural limitations. The device of Hirano can be held by a finger and therefore reads on the functional limitation of worn on the outer finger. The break in the ring would be visible while the ring is being held by the finger.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Hirano JP 11028242.

4. Hirano teaches an acupressure ring comprising: two or more rings having a visual indicator visible when the ring are worn and a projection extending inwardly from an inner surface of the acupressure ring, the projection being approximately orthogonal to a visual indicator, wherein the visual indicator is provided by a break in the acupressure ring; wherein the projection has a mid-point, which is approximately 90 degrees around the acupressure ring from the mid-point of the visual indicator; the

Art Unit: 3734

cross section of the projection is round, cylindrical, conical, square or rectangular; wherein the projection is a single projection (Embodiment of fig. 3 shows holes 1b that can be used to place the projection 2 in multiple positions including orthogonal to the visual indicator. Also as translated by the abstract, the projection can be provided with a slide mechanism so that the position of the projection 2 attached to the ring can be varied.); and wherein the acupuncture ring is comprised of two rings; wherein a bridging member connects each one of the rings.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirano.

7. Hirano discloses the claimed invention except for the recited distance values. It would have been obvious to one having ordinary skill in the art at the time the invention

Art Unit: 3734

was made to use the recited ranges, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

### ***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
